SUMMARY

Cyber Security and Computer Science graduate with hands-on experience in network infrastructure, systems administration, and secure software development. Built a comprehensive home lab featuring a custom router, self-hosted servers (Ubuntu, Windows Server 2022), Raspberry Pi-based web hosting, and in-house network cabling. Completed an internship at Murdoch University as a Junior Security Analyst, gaining practical experience in threat analysis and security auditing. Skilled programmer in C, C++, Python, Rust, Java, and JavaScript, with a strong interest in automation and system integration. Proficient in Microsoft Office and comfortable working across diverse technical environments. For more information, feel free to visit my website.

EXPERIENCE
